Pre Engineered Foam Spray (PEFS)

Loss Of Pressure (LOP)

FEATURES AND BENEFITS

- PEFS systems are CSIRO ActivFire listed and have been tested to the requirements of AS 5062.
- All PEFS system are design and installed to meet the specific requirements of your machine.
- Chubb's PEFS systems technicians are trained to a nationally endorse competency specifically covering installation, inspection, testing and maintenance of pre-engineered fire systems for transportable equipment. This competency forms part of the national recognize qualification - Certificate III in asset Maintenance

CYLINDER ASSEMBLY

- 5 cylinder size
- Stainless steel construction
- Heavy duty cylinder brackets

FIRE SYSTEM MONITORING ALARM

DETECTION LINE

- Linear Heat Detection (LHD) tubing

LOP ACTUATOR

- Pneumatic and electric actuation options
- Automatic actuation with manual actuators installed at strategic location

DISCHARGE LINE

- Stainless steel tubing
- Corrosion resistant fittings
